Senior Software Engineer with 6+ years of full-stack experience building scalable, business-critical, customer-facing applications. Technical owner of AmeriSave's flagship digital lending platform serving 33,000+ daily users and powering approximately 60% of funded loans. Experienced in software architecture, technical leadership, modern front-end frameworks, microservice-based systems, and cloud-native development. Most recently working with Vue, Nuxt, Node.js, Fastify, TypeScript, and Microsoft Azure.

EDUCATION

Bachelor of Science, Computer Science Aug 2015 - May 2020

California State University San Marcos · San Marcos, CA

EXPERIENCE

Senior Software Engineer Feb 2025 - Present

AmeriSave Mortgage · Remote

- Technical owner of InstaWizard, AmeriSave's flagship digital lending platform serving 33,000+ daily users and powering approximately 60% of funded loans.
- Lead the architecture and modernization of the mortgage application platform, rebuilding frontend and backend systems into scalable cloud-native microservices using Vue 3, Nuxt 3, Fastify, TypeScript, Microsoft Azure, SQL Server, Redis, and Cloudflare.
- Led frontend performance optimization initiatives, improving Lighthouse Mobile Performance from 28 to 78 (+179%) while reducing Largest Contentful Paint by 91% (23.2s -> 2.2s) and Total Blocking Time by 71%.
- Designed and implemented a self-service Optimizely A/B testing framework, enabling product and marketing teams to independently launch experiments and validate product decisions with data.
- Implemented end-to-end observability with Datadog RUM, APM, dashboards, monitors, and alerting, improving production visibility and accelerating issue detection and resolution.
- Provide technical leadership for a 7-engineer team through architecture reviews, mentoring, production incident leadership, technical interviews, and engineering standards.

Senior Software Engineer Aug 2020 - Feb 2025

Capital One · Plano, TX

- Developed enterprise applications using TypeScript, SolidJS, React, and LitElement for Auto Navigator and Dealer Navigator, Capital One's nationwide automotive financing platforms.
- Led integration of the Auto Navigator Search Micro Frontend into Capital One's white-label platform, enabling hundreds of dealerships to adopt the solution.
- Designed, developed, and owned the Trade-In Micro Frontend from architecture through production deployment, delivering a reusable solution integrated into Dealer Navigator.
- Leveraged New Relic and Splunk to monitor production systems, troubleshoot issues, and improve platform reliability.
- Mentored engineers, led intern projects, owned production releases, and contributed to technical design, architecture, and engineering standards.

SKILLS

Languages: JavaScript · TypeScript · Kotlin · Java · HTML · CSS

Frontend: Vue 3 · Nuxt 3 · React · SolidJS · Angular · LitElement · Pinia · TanStack Query · Redux · Zustand

Backend: Node.js · Fastify · Spring Boot · REST APIs · Redis · Microsoft SQL Server · ElasticSearch

Observability: DataDog · Splunk · New Relic · PagerDuty

Cloud: Amazon Web Services (AWS) · Microsoft Azure · Cloudflare · Amazon ECS · Amazon S3 · CloudFront · OpenShift

DevOps: Git · GitLab · GitHub · CI/CD · Docker

Testing: Playwrite · Cypress · Jest · Vite

AI: Cursor · Claude · ChatGPT · Agents · MCPs · Skills
